5// messages for LEXICAL errors

|    |                                      |                                 |
|----|--------------------------------------|---------------------------------|
| 0  | "File not found"                     | 5// messages for LEXICAL errors |
| 1  | "String not accepted"                |                                 |
| 2  | "File contain LEXICAL error(s)"      |                                 |
| 3  | " "                                  |                                 |
| 4  | " "                                  |                                 |
| 5  | "DEF missing"                        | 10//messages for SYNTAX errors  |
| 6  | "BODY missing"                       |                                 |
| 7  | "{ missing"                          |                                 |
| 8  | "} missing"                          |                                 |
| 9  | "; missing"                          |                                 |
| 10 | "ID missing"                         |                                 |
| 11 | “, missing"                          |                                 |
| 12 | "= missing"                          |                                 |
| 13 | ") missing"                          |                                 |
| 14 | "File contain SYNTAX error(s)"       |                                 |
| 15 | "Wrong Expression"                   | 5//messages for SEMANTIC errors |
| 16 | "Undefined ID"                       |                                 |
| 17 | "Can put INT in BYTE or BYTE in INT" |                                 |
| 18 | "Multiple declaration"               |                                 |
| 19 | "Division by zero"                   |                                 |
| 20 | "File contain SEMANTIC error(s)"     |                                 |

## Requirements: -

- 1- Call the fillTable method in the compiler class
- 2- Call the first error message in the lexical class

```
package compiler;
```

# [Language Translators]/ [Third]
